Envana
OGMP 2.0

Build audit-ready methane inventories with **confidence**.

From source-level measurements to audit-ready inventories, Envana helps oil and gas operators simplify OGMP 2.0 reporting and build defensible methane inventories.

Why Envana OGMP 2.0

Transform methane data into defensible reporting.

Envana helps operators transform source-level methane data into audit-ready reporting through governance, reconciliation, and traceability.

Without Envana OGMP 2.0	With Envana OGMP 2.0
• Disconnected source-level methane data • Manual reconciliation across sites and sources • Limited traceability and documentation • Complex Level 4 & 5 reporting	• One governed source of truth for methane data • Structured reconciliation workflows • Complete transparency and traceability • Audit-ready OGMP 2.0 reporting

Built around operational workflows.

Govern source-level methane data with the reconciliation and traceability required for OGMP 2.0.

Build audit-ready inventories

Create transparent, audit-ready methane inventories designed to support OGMP 2.0 reporting.

Govern source-level methane data

Organize source-level methane data with standardized methodologies and documented assumptions.

Reconcile with confidence

Connect measurements to inventories through structured reconciliation workflows and complete traceability.

Accelerate implementation

Streamline Level 4 & 5 implementation with configurable workflows and structured methane management.

Envana OGMP 2.0

One foundation.
Multiple solutions.

Envana CATALYST

Centralize emissions data, standardize methodologies, and create a trusted foundation for enterprise emissions management.

Envana REDUCTION

Identify, prioritize, and track emissions reduction opportunities based on cost, impact, and feasibility.

Envana FORECASTING

Model future emissions, evaluate scenarios, and understand how operational decisions impact your decarbonization goals.

Envana OGMP 2.0

Manage source-level methane data and streamline compliance with OGMP 2.0 reporting requirements.

Envana Advisory

Partner with Envana's experts to accelerate implementation, strengthen governance, and maximize the value of emissions data.

Your carbon intelligence journey starts here.
